📍 Hyderabad, Telangana, India

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Solidity, Python, Java

Frameworks & Libraries: Angular.js, React.js, Node.js, nest.js, next.js, Web3.js, Ethers.js, flutter

Blockchains: Ethereum, Solana, Polygon, monad, BSV

Databases & Tools: MongoDB, Pinata, Git, GitHub, Linux, Google Cloud, expo

EDUCATION

B.Tech (Hons.) CSE

KL University Hyderabad

9.44 CGPA

12th

Gopi Birla Memorial School (CBSE)

Mumbai

10th

Orchids International School (CBSE)

Mumbai

ACHIEVEMENTS

RootStock Blockchain Hackathon:

First Place

Monad Blockchain Hackathon

Hyderabad: Second Place

Monad Blockchain Hackathon Delhi:

third Place

Impact Tech Hackathon: First Place

Akindo Hackathon: 2nd Place

Eth India Villa Hackathon: top 6

Ripple Hackathon IIT Bombay:

Runner Up (Top 5)

CERTIFICATIONS

🌟 Certified Ethical Hacker (CEH-L1)

🌟 Certified Blockchain Developer

🌟 Fortinet Certified Associate

Cybersecurity 7.4 Operator

🌟 Red Hat Certified Enterprise

Application Developer

🌟 Github foundations certification

🌟 AWS Cloud practitioner

🌟 Automation Anywhere

Professional

🌟 Oracle Ai Foundation and cloud

Infrastructure certification

SUMMARY

B.Tech (CSE Hons.) 2026 graduate specializing in Cybersecurity and Blockchain with experience in full-stack development, smart contracts, and scalable web applications. Skilled in React.js, Next.js, NestJS, Web3, and secure software development with strong interest in blockchain and AI-driven systems.

EXPERIENCE

Full Stack Developer - Webyalaya

- Developed and maintained the complete mobile application.
- Worked on website bug fixes, feature development, and contributed to Azure-based deployment and codebase improvements.

Technical intern - Estah Society

- Worked on the companys wordpress website and rebuilt one of their initiative website completely on nest.js and fixed a hack on the main organization website.

Gen AI Full Stack Developer - DVK Communications

- Developing production-grade Gen AI-powered full-stack applications leveraging modern AI technologies.
- Working across frontend and backend systems for AI-driven applications.

Software Developer Intern - Goodbreach

- Contributed to scaling the product from MVP to production using **Flutter**, **Next.js**, and **MongoDB**.
- Built and optimized frontend and backend functionalities for Android and web platforms.

Software Engineering Intern - Coforge

- Worked on Bata's platform using **Java Spring**, identifying bugs and implementing fixes to improve performance and UX.

G & IP DGA Intern - KPMG

- Supported the **State Revenue Analytics Dashboard** through data analysis, documentation, and client-facing deliverables.

Blockchain Developer - Timechain Labs

- Built **BSV smart contracts**, responsive **Svelte** frontends, and scalable **NestJS** backend systems.
- Led frontend development for the **Deep Revenue Sharing System (MVP)**.

Full Stack Developer - Wallet Hunter Token 2049

- Engineered backend automation modules in **Python** and built Web3 interfaces using **React.js**.

Evangelist - Oraichain Labs

- Contributed to **Rust-based smart contracts** and improved technical documentation for developers.

Cybersecurity Intern - Threat Prism

- Conducted vulnerability assessments and supported security risk analysis activities.

PERSONAL PROJECTS

SwipeGig – Decentralized Talent Marketplace

- Built an AI-powered decentralized freelance marketplace with smart contract payments and on-chain identity verification.

Autonomous AI Field Engineer Agent

- Developed an AI agent system with Web3-based incident verification and audit mechanisms.

Deep Revenue Sharing System (MVP)

- Built a decentralized profit-sharing platform with automated payouts and analytics dashboards.

Monad Game

- Developed a real-time on-chain gaming dApp on the Monad Blockchain.

RentRight – Home Rental DApp

- Built a decentralized rental platform with escrow and smart contract workflows.

Revenue Analytics Dashboard

- Built a React dashboard visualizing state-wise revenue datasets and analytics.

HealthChain – Medical DApp

- Developed a blockchain-based medical appointment and health record management system.

Crypto Market Analysis

- Built a Python-based crypto analytics engine with automated market alerts.
